Upgraded Features and Ease of Use

Smart Function Key (Top Key)
Universal Design

Visual Ringer and Multi-Function Key on Top of Handset

The Smart Function Key (Top Key) on the top of the handset flashes according to the situation. By pressing this key while it is flashing, you can play the answering machine message or respond to the call. This provides an entirely new level of easy use.

1.8″ LCD, Amber Backlight
Universal Design

The large LCD screen

The large, backlit 1.8-inch screen is easy-to-read, and the simple menu screen lets you access functions without confusion.

Longer Recording Time
Unique Technology

30 min. of Recording Time

This system automatically answers and takes a message from the caller when nobody is at home. Total recording time of about 30 minutes available.

Power Back-Up Operation*
Unique Technology

Handset Usable at Ease Even When Power Is Out

Because the base unit has a built-in battery, the user can continue talking from the cordless handset without any signal interruption for about 1 minute after a power outage. After that, the user can place a handset on the base unit and switch it to supply power from the handset. The user can then continue talking over the speakerphone or from a separate handset.

* Please note that this system is not available in some countries.

† Lead, cadmium, mercury, hexavalent chromium and specified brominated flame retardants (PBB and PBDE) http://panasonic.net/eco/topics/suppliers/

Advanced Alarm Clock
Unique Technology

Upgraded Memo Alarm

There is no need for a separate alarm clock, because the alarm function lets you set a different wake-up time for each day, and the Snooze function sounds the alarm every 5 minutes.

TAM Counter on Base
Unique Technology

You Can See the Message Count without Operating the Handset

Voicemails can pile up while you're away. Having to operate the handset just to see how many messages you have is bothersome. The TAM Counter's handy location on the base unit makes it easy to see how many messages you have with a glance when you return home.

2-Digit Visible LED

One Touch Eco Mode
Ecology

One Touch Eco Modes Let You Lower the Power Consumption

Easy to turn on eco mode by one touch pressing the eco button on the handset. In eco mode, the signal output is reduced by 90%*.

* Compared to the normal mode
